

POSTERS

(Version : September 24, 2011)

33rd International Telecommunications Energy Conference

9 - 13 October 2011
The Netherlands

- P-1 **A Novel Voltage Balancer for EDLCs by Cockcroft-Walton Circuit Having Zeta Converter**
Keiju Matsui - Chubu University, Japan
Takumi Nakashima, Masaru Hasegawa
- P-2 **New Coupled-inductor SEPIC Converter with Very High Conversion Ratio and Reduced Voltage Stress on the Switches**
B. Axelrod - Holon Institute of Technology, Israel
Y. Berkovich
- P-3 **A Single-Stage Bridgeless Power-Factor-Correction Rectifier Based on Flyback Topology**
K.T. Mok - The Hong Kong Polytechnic University, China
Y.M. Lai, K.H. Loo
- P-4 **Reliability Improvement of FB inverter in HID Lamp Ballast using UniFET™ II MOSFET family**
Won-Seok Kang - Fairchild Semiconductor, Korea
Jae-Eul Yeon, Hee-Jun Kim, Tae-Young Ahn
- P-5 **The New Electric Shielding Scheme with Comb-shaped Wire and its Applications in SMPS**
Qingbin Chen - Fuzhou University, China
Wei Chen
- P-6 **Topology Characteristics Analysis and Performance Comparison for Optimal Design of High Efficiency PFC Circuit for Telecom**
Yun-Sung Kim - SungKyunKwan University, Korea
Byoung-Kuk Lee, Julian W. Lee
- P-7 **Single Carrier Wave Comparison PWM for Vienna Rectifier and Consideration for DC-Link Voltage Unbalance of Offset Voltage Effects**
Hag-Wone Kim - Chungju National University, Korea
Byung-Chul Yoon, Kwan-Yuhl Cho, Byung-Kuk Lim, Soon-Sang Hwang
- P-8 **Drive Circuit for 2-stage Converter Combined with Coupling Capacitor**
Yuki Watanabe - Oita University, Japan
Terukazu Sato, Kimihiro Nishijima, Takashi Nabeshima, Masaoki Sekine
- P-9 **Design of a Distortion-Free PFC CV/CC AC Power Supply Having Variable Capacitance Devices**
Akihiko Katsuki - Kyushu Institute of Technology, Japan
Yuichi Sugimoto
- P-10 **Current Distortion in Variable Capacitance Device for the Use in AC Power Converters**
Akihiko Katsuki - Kyushu Institute of Technology, Japan
Takuya Oki
- P-11 **Application of Geometric Algebra for Power Factor Improvement**
Adolfo Chaves Jiménez - Delft University of Technology, The Netherlands
Dimitri Jeltsema, Jacob van der Woude

- P-12 **Current Technique Applied In Single Phase PFC Boost Converter Based On Discrete-Time One Cycle Control**
Tiago Kommers Jappe - Federal University of Santa Catarina, Brazil
Samir Ahmad Mussa
- P-13 **Simulating the EMI Characteristics of Flyback DC/DC Converters**
Andreas Karvonen - Chalmers University of Technology, Sweden
Torbjörn Thiringer
- P-14 **A Modified Forward Converter with a Capacitive Output Filter for Isolated LED Lighting Applications**
Myungbok Kim - Korea Institute of Industrial Technology, Korea
Daeyoung Im
- P-15 **Design Considerations of DC/AC Drives Using ZCZVTF Converter, PWM Inverter; A Study**
Saeed Jahdi - City University London, UK
Loi Lei Lai
- P-16 **Carbon Nanotube-Based Power Diode**
Omar F. Mousa - The University of Alabama, USA
Jaber A. Abu Qahouq
- P-17 **Basic Experimental Study on Effect of Bentonite to Efficiency of Wireless Power Transfer Using Magnetic Resonance Coupling Method**
Vissuta Jiwariyavej - The University of Tokyo, Japan
Takehiro Imura, Takuya Koyanagi, Yusuke Moriwaki, Yoichi Hori, Chiaki Nagai, Kenichi Ando, Kazuya Watanabe, Masao Uyama
- P-18 **Standardization for interoperable autonomous smart sensors in the future energy grid system**
Jorge Higuera - Technical University of Catalonia UPC-BarcelonaTech, Spain
Jose Polo
- P-19 **Estimation of Membrane Hydration Status for Standby Proton Exchange Membrane Fuel Cell Systems by Impedance Measurement: First Results on Cell Characterization**
Benoit Bidoggia - Aalborg University, Denmark
Søren Knudsen Kær
- P-20 **Efficient design of boost converters for fuel cells**
Damian Giaouris - Newcastle University, UK
Fotis Stergiopoulos, Chrysovalantou Ziogou, Simira Papadopoulou, Spyros Voutetakis
- P-21 **Building Energy Management System based on Smart Grid**
KyungGyu Park - Korea Telecom, Korea
Yoonkee Kim, SeonMi Kim, KwangHo Kim, WookHyun Lee, HwaChoon Park
- P-22 **Contactless Battery Charger with High Relative Separation Distance and Improved Efficiency**
Hugo Marques - Technical University of Lisbon, Portugal
Beatriz V. Borges

- P-23 **Switching of Green Energy – Reliable Switching and Protection of 400 V DC Systems Sustainably Powered by Photovoltaic Systems**
Frank Gerdinand - E-T-A Elektrotechnische Apparate GmbH, Germany
Reinhold Gümpelein
- P-24 **Contactless Charging Systems**
Tomio Yasuda - Technova Inc., Japan
Isami Norigoe, Shigeru Abe, Yasuyoshi Kaneko
- P-25 **Optimization using Transmitting Circuit of Multiple Receiving Antennas for Wireless Power Transfer via Magnetic Resonance Coupling**
Takehiro Imura - The University of Tokyo, Japan
Yoichi Hori
- P-26 **Design of Power Conversion System for Stirling Engine Micro-CHP Integrated into DC Power Distribution Network**
Se-Kyo Chung - Gyeongsang National University, Korea
Yujin Song
- P-27 **Energy from Biogas, Renewables for Supplying Telecommunications in Remote, Rural Areas**
Balázs Rakos - Budapest University of Technology and Economics, Hungary
Péter Stumpf, István Nagy
- P-28 **The energy saving evaluation of Green DSL while infield mass implementation**
Claudio Bianco - Telecom Italia, Huawei Technologies Co., Ltd., Italy
Gianluca Griffa, Nickle Lee, Paolo Gemma, Zhu Bin
- P-29 **Optimum Battery Size Selection in Standalone Renewable Energy Systems**
Hossein Delavaripour - Isfahan University of Tech, Iran
Hamid R. Karshenas, Alireza Bakhshai, Praveen Jain
- P-30 **Design of Power Sharing System Between Supercapacitors and Battery in an Uninterruptible Power Supply**
Amine Lahyani - Université de Carthage, Tunisia
Pascal Venet, Alaa Troudi
- P-31 **Analysis of Inrush Currents for DC Powered IT Equipment**
Brian Davies - Anderson Power Products, USA
- P-32 **Development of a 1.5kW Digital Controlled DC-DC Converter for Mild Hybrids**
Chan-Ho Kang - Egtronics Co., Ltd, Korea
Kyung-Man Kim, Kyung-Ho Lee, Hee-Jun Kim
- P-33 **Sub-agent elements for control methods in multi-agent energy management system**
Timur Yunusov - University of Reading, UK
William Holderbaum, Ben Potter
- P-34 **Energy saving using location aware sensor networks**
Eoin Hurrell - Dublin City University, Ireland
Alan F. Smeaton

- P-35 **The Nonlinear Control of Tapped Inductor Buck Converter Based on Port-controlled Hamiltonian Model**
Xiaojun Guo - Fuzhou University, China
Chao Huang, Yuzhen Xu, Weiming Lin
- P-36 **A Novel Fast Response Current-Mode DC-DC Converter Using ICO**
Fujio Kurokawa - Nagasaki University, Japan
Kazuhiro Kajiwara
- P-37 **Design and Experimental Results of Improved Dynamic MPPT Performance by EN50530**
Byunggyu Yu - Korea Institute of Energy Research, Korea
Gwonjong Yu, Youngroc Kim
- P-38 **Implementation of Space Vector Modulation For FPGA Based Frequency Converter**
Preeti Agarwal - MNNIT, India
Anshul Agarwal, Vineeta Agarwal
- P-40 **Energy Efficient Fine-grained Approach for Solar Photovoltaic Management System**
Yuncong Jiang - The University of Alabama, USA
Jaber A. Abu Qahouq, Ahmed Hassan, Mahrous E. Ahmed, Mohamed Orabi
- P-41 **Multiple Solar Panels Maximum Power Point Tracking Using the Output Current**
Yuncong Jiang - The University of Alabama, USA
Jaber A. Abu Qahouq
- P-42 **A Practical Circuit-based Model for Li-ion Battery Cells in Electric Vehicle Applications**
Long Lam - Delft University of Technology, The Netherlands
Pavol Bauer, Erik Kelder
- P-43 **An experimental study of an efficient supercapacitor stacking scheme to power mobile phones**
José Monteiro - Instituto Universitário de Lisboa (ISCTE-IUL), Portugal
Nuno Garrido, Ricardo Fonseca
- P-44 **Sodium-Metal Halide Batteries in Diesel-Battery Hybrid Telecom Applications**
Job Rijssenbeek - GE Global Research, USA
Herman Wiegman, David Hall, Christopher Chuah, Ganesh Balasubramanian
- P-45 **Single-Cell Photovoltaic with Integrated Boost Converter**
Ahmed Hassan - South Valley University, Egypt
Emad Abdelkarem, Mahrous E. Ahmed, Mohamed Orabi, Yuncong Jiang, Jaber A. Abu Qahouq
